

SVALBARD

ARCTIC SKI CRUISE

25/5 – 2/6 2019

2 – 10/6 2019

Experience unique ski touring and the beauty of Svalbard on our Arctic Ski Cruise expedition. Unforgettable moments with magnificent scenarios, arctic wildlife, great skiing and midnight sun.

During this expedition we will be cruising along the west coast of Svalbard between the latitudes 77–80 degrees north. Every day our professional mountain guides will take you to explore new areas for epic ski touring. First descents, powder and spring snow, untouched lines ending to sand beaches. Whales feeding in the fjords and polar bear tracks crossing the remote arctic landscape.

Upon returning to the ship, après-ski is waiting with unbeatable views. The anchors are lifted up again and the dinner is served. The evening continues on the deck with wildlife watching in the midnight sun. Why not relax in the hot tube.

Our ship M/S Origo is constructed for heavy ice conditions and equipped with the latest navigation and safety technology. She has been operating at Svalbard over 20 years. The vessel offers cosy accommodation in double cabins with delicious meals. M/S Origo is booked only for our group during the expedition.

The maximum group size for this expedition is 20 persons.
